132 1. Длительный отклик, на запись каждой трансформации.
133 2. Лог транзакций дополнительно наполняется отменёнными транзакциями.
134 -> Это может решаться упаковкой/исключением дублирующих операций.
135 -> Также это может решаться тем, что короткие транзакции вообще
136 не будут записываться в случае отката.
137 3. Перед тем как выполнять отмену операций транзакции нужно дождаться пока все
    операции (трансформации)
    будут записаны в лог.

398 Можно ли замкнуть движение? Может ли это быть кругом? Можно ли замкнуть время? Или остаётся
